

anamed Malawi cooperation anamed South Africa

Our story started **2018** in Zimbabwe on a meeting of Foundation for Farming close to Harare. I went with my team leader to a big conference and there I met Joy van Eden. Our love to the LORD and our longing to bring holistic healing let us build up a special friendship. But then COVID came, and we just could stay in email contact.

As soon as travelling was again back a trainer team from Malawi was invited to Polokwane Eagles Nest Christian School where we conducted the first anamed seminar in South Africa.

Eagles nest involved the school and the teachers to learn about natural medicine and implemented our natural medicine teachings same as the farming teachings in her curriculum at the school.

In our seminar we learn about Malaria, Wounds, Diarrhoea and about a variety of tropical healing plants, like Papaya, Guava, Moringa, Bitter leave, Neem and many more.

Throughout the week we study day by day the word of God to see how we can apply His word in our daily lives

The motivation for our work with natural medicine comes from our Christian faith.

For God created the world and saw it was good, he planted the garden of Eden with all kinds of trees for pleasure of the eye and good for food. He gave us leaves for healing.

To do everything in practical work yourself is the secret that every participant can do it later at home and can help his family and the community around
